Japanese is a synthetic language with a regular agglutinative subject-object-verb morphology, with both productive and fixed elements. In language typology, it has many features divergent from most European languages. Its phrases are exclusively head-final and compound sentences are exclusively left-branching. There are many such languages, but few in Europe.

Portuguese grammar, the morphology and syntax of the Portuguese language, is similar to the grammar of most other Romance languages – especially that of Spanish, and even more so to that of Galician. It is a relatively synthetic, fusional language. Nouns, adjectives, pronouns, and articles are moderately inflected: there are two genders (masculine and feminine) and two numbers (singular and ...
