DELAY DIFFERENTIAL EQUATIONS DAVID E. GILSINN AND FLORIAN A. POTRA This paper is presented in honor of Kendall Atkinson. ABSTRACT. The monodromy operator of a linear delay differential equation with periodic coefficients is formulated as an integral operator. The kernel of this operator includes a factor formed from the fundamental solution of the linear delay differential equation.

MT5802 - Integral equations Introduction Integral equations occur in a variety of applications, often being obtained from a differential equation. The reason for doing this is that it may make solution of the problem easier or, sometimes, enable us to prove fundamental results on the existence and uniqueness of the solution.
