In computer vision, blob detection methods are aimed at detecting regions in a digital image that differ in properties, such as brightness or color, compared to surrounding regions. Informally, a blob is a region of an image in which some properties are constant or approximately constant; all the points in a blob can be considered in some sense to be similar to each other.

There has always been a "Language for non-Unicode programs" settings in the "Region and Language" settings in XP, Vista and 7. I installed Windows 8 (had some unrelated problems, so I had to revert to Windows 7 though), and I tried installing a piece of software that was not made with Unicode, but Shift-JIS (Japanese).
