Most students taking a course in linear algebra will have completed courses in differential and integral calculus, and maybe also multivariate calculus, and will typically be second-year students in university.

A First Course in Linear Algebra

Linear algebra moves steadily to n vectors in m -dimensional space. We still want combinations of the columns (in the column space). We still get m equations to produce b (one for each row). Those equations

may or may not have a solution. They always have a least-squares solution. The interplay of columns and rows is the heart of linear algebra.
