â€œI suffer, therefore, I rejoice.â€• This paradoxical statement sums up my entire academic career in psychology. Burdened by a long history of suffering in China, growing up during Japanese occupation and civil war, and enduring decades of discrimination and marginalization in North America, it is inevitable that I look at life and psychology through a different prism (see my online ...

The current research explores the relationship between living abroad and self-concept clarity. We conducted six studies (N = 1,874) using different populations (online panels and MBA students), mixed methods (correlational and experimental), and complementary measures of self-concept clarity (self-report and self-other congruence through 360-degree ratings).

In physics, the Lorentz transformations are a one-parameter family of linear transformations from a coordinate frame in space time to another frame that moves at a constant velocity, the parameter, within the former. The transformations are named after the Dutch physicist Hendrik Lorentz. The respective inverse transformation is then parametrized by the negative of this velocity.
