can construct a similar, albeit less rich, representation—a mental model of the world based on the meaning of the description and on their knowledge (22). The current theory of mental models (the “model” theory, for short) makes three main assumptions (23). First, each mental model represents what is common to a distinct set of possibilities.

Mental models and human reasoning

The mental models approach was initially motivated by dissatisfaction with the ability of the mental rule approach to offer a plausible explanation of systematic patterns in experimental results.
