DNA molecular markers in plant breeding: current status and recent advancements in genomic selection and genome editing

DNA molecular markers in plant breeding: current status

Main conclusion. This article provides an up-to-date review concerning from basic issues of polyploidy to aspects regarding the relevance and role of both natural and artificial polyploids in plant breeding programs.

The polyploidy and its key role in plant breeding

Definition. All living things were traditionally placed into one of two groups, plants and animals. This classification may date from Aristotle (384 BC – 322 BC), who made the distinction between plants, which generally do not move, and animals, which often are mobile to catch their food. Much later, when Linnaeus (1707–1778) created the basis of the modern system of scientific ...

Plant - Wikipedia

Early. The genus *Narcissus* was well known to the ancients. In Greek literature Theophrastus and Dioscorides described *N. poeticus*, probably referring to *N. poeticus*, although the exact species mentioned in classical literature cannot be accurately established. Pliny the Elder later introduced the Latin form *narcissus*. These early writers were as much interested in the plant's possible ...

THE PLANT GENOME JULY 2008 VOL.1, NO.1 5 REVIEW & INTERPRETATION Status and Prospects of Association Mapping in Plants Chengsong Zhu, Michael Gore, Edward S. Buckler, and Jianming Yu*

Status and Prospects of Association Mapping in Plants

Adventitious roots are plant roots that form from any nonroot tissue and are produced both during normal development (crown roots on cereals and nodal roots on strawberry [*Fragaria* spp.]) and in response to stress conditions, such as flooding, nutrient deprivation, and wounding. They are important economically (for cuttings and food production), ecologically (environmental stress response ...

The Physiology of Adventitious Roots | Plant Physiology

Plant cell cultures from cloudberry, lingonberry and stoneberry were studied in terms of their nutritional properties as food. Carbohydrate, lipid and protein composition, in vitro protein digestibility and sensory properties were investigated.
