

the boron letters pdf

A series of letters by history's greatest copywriter Gary C. Halbert, explaining insider tactics and sage wisdom to his youngest son Bond. Once only available as part of a paid monthly premium, The Boron Letters are unique in the marketing universe and now they are a bona fide cult classic among direct response marketers and copywriters around the world.

The Boron Letters: Gary C. Halbert, Bond Halbert

Boron is a chemical element with symbol B and atomic number 5. Produced entirely by cosmic ray spallation and supernovae and not by stellar nucleosynthesis, it is a low-abundance element in the Solar system and in the Earth's crust. Boron is concentrated on Earth by the water-solubility of its more common naturally occurring compounds, the borate minerals.

Boron nitride is a heat and chemically resistant refractory compound of boron and nitrogen with the chemical formula BN. It exists in various crystalline forms that are isoelectronic to a similarly structured carbon lattice. The hexagonal form corresponding to graphite is the most stable and soft among BN polymorphs, and is therefore used as a lubricant and an additive to cosmetic products.

Boron fire, tidier than hydrocarbons', abler, is less easily lit. Hydrogen, in principle still lighter, ignites very easily ... Boron: A Better Energy Carrier than Hydrogen? ... while with boron the easy part is the handling. If drivers send slabs of (even less ignitable!) boron across the Earth, and get back boron, both forms' manageability helps this energy tap be efficient.
